Forecast for Wednesday 24 May 2023

Weather: Patchy cloud thickening during the early hours to give a generally cloudy start. Cloud lifting and breaking through the morning however to give a fine afternoon with some strong sunshine. Staying dry throughout but a northerly breeze on the summits giving a cooler feel.

Chance of cloud-free hill tops above 600m: 60% becoming 95% into the afternoon.

Low Cloud and visibility: Cloud tending to thicken through the early hours, with bases generally above 600-700m, giving some poor visibility in cloud across the higher tops. Cloud increasingly lifting and breaking above the summits through the morning however to give very good visibility to all levels by the afternoon.

Freezing Level*	1500m	1500m	1600m	2700m	3000m	2900m	2800m

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Note the "Feel Like" temperatures above, as temperatures will still feel chilly on the tops in the wind even into the afternoon. Adequate layers advised despite the afternoon sunshine if heading out early. High afternoon UV levels also mean adequate sun protection is a must, particularly given the cloudier start.

Recent rainfall: measured at Malham: altitude 375m

Forecast for Thursday 25 May 2023

Weather: Probably a cloudier day but staying fine and largely dry with some bright or sunny spells. Chance of a few isolated light showers by late-afternoon and evening.

Maximum wind: Northerly to north-easterly 10 mph gusting 15-20 mph.

Chance of cloud-free hill tops above 600m: 70% becoming 95% into the afternoon.

Low Cloud and visibility: Once again patchy cloud tending to thicken overnight, with bases generally 500-700m, giving some poor visibility in cloud across the higher tops. Cloud lifting and breaking above the summits through the morning to give very good visibility to all levels by the afternoon. Becoming moderate in any showers late in the day.

Temperature: **Valleys:** Plus 9 Celsius, rising to Plus 15 Celsius.
At 600m: Plus 7 Celsius, rising to Plus 14 Celsius.
Freezing level: Above summits.
